

WEEE Policy Statement

Statement by P C Werth Ltd in respect of The Waste Electrical & Electronic Equipment Regulations 2006 (WEEE)

PRODUCER OBLIGATION

As a producer and supplier to the Business to Business market, we are committed to the protection of the environment and therefore the successful implementation of the above regulations.

We are a registered producer of WEEE and a member of an approved Compliance scheme operated by Valpak PLC.

It is our policy to offer a like for like, one for one exchange service to customers wishing to purchase new equipment. The take back of old equipment in exchange for new extends to equipment placed on the market before 13th August 2005.

Customers wishing to return WEEE should advise the Company at the time of placing their order for new equipment.

We will provide information to customers by various means including Company Website, product operating instructions or terms and conditions.

We will not be responsible for WEEE originally produced by ourselves where our branding has been replaced with alternative branding, or where the WEEE has been converted or modified without our permission.

Where users are not replacing WEEE and the WEEE does not bear the crossed out wheelee bin symbol, they are required to meet the costs of collection, treatment and disposal themselves. There is no financial obligation on either ourselves or our Distributors in respect of this.

A charge will be made where WEEE of our supply bearing the crossed out wheelee bin symbol is being returned to ourselves and not replaced.
