

Listening and Communication Enhancement

What is LACE training?

LACE an interactive, adaptive, AR program designed for home or clinic use. LACE helps develop listening/communication skills and strategies to improve speech understanding in challenging situations:

- Noisy environments
- Rapid talkers
- Competing voices

How does LACE Benefit your practice?

LACE training compliments your services by giving you the ability to offer a proven, efficient auditory training system that can be:

- Implemented in 15 minutes in the clinic
- Helpful in reducing return visits and/or time per patient
- Taken home and continued on Computer or DVD player
- Monitored on your office computer to follow patient progress
- Used to provide Rehab counseling with print outs of patient performance on Standardized testing and training activities

How does LACE Benefit your patients?

LACE training significantly helps people with listening difficulties because it:

- Teaches them that hearing does not equal listening
- Demonstrates that not every word needs to be understood to get the message
- Helps the patient adjust to new amplified sound
- Builds confidence that they actually heard and understood what was said
- Provides hundreds of communication and compensatory strategies
- Improves cognitive skills training (speed of processing and auditory memory)
